

## Injuries caused by domestic violence

Have you been attacked and injured  
by a person close to you?

**Please see a doctor as soon as possible to be examined and treated. Your health is important!**

Have your injuries documented by a doctor in order to have proof of the violence you suffered. This record is important for now and for later, for example, should you want to press charges or separate from your partner (custody, right of residence, etc.).

- ✓ Go to your doctor or a hospital emergency room as soon as possible. Some injuries cannot be seen and documented later on.
- ✓ Describe everything that has happened. Show all of your injuries. It is also necessary to state if you were choked or your throat was injured. Point out any pain you have.
- ✓ Some injuries are not seen until later on. Don't hesitate to recontact your doctor's surgery, clinic or the outpatient clinic for the protection against violence (Gewaltschutzambulanz) at the Charité hospital.
- ✓ A special form should be used for the documentation. Every injury will be drawn on a body diagram and described. It is good to have photos taken of the injuries.

**All doctors are bound to doctor-patient confidentiality.  
All information will stay in your file.  
No one else will be informed without your consent.**
